Warehouse Operations SOP

Document HPL-OPS-002 | Version 5.0 | Effective March 1, 2026 | Owner: Warehouse Operations

1. Scope

This Standard Operating Procedure applies to all inbound and outbound freight handled at Harbor & Pine Logistics facilities. It is binding on HPL staff, contracted carriers and drivers. All times are local facility time (America/Chicago).

1.1 Facilities

Code	Facility	City	Hours	Days	Docks	Hazmat docks
CHI1	Chicago Central DC	Chicago, IL	06:00-22:00	Mon-Sat	12	11, 12
JOL1	Joliet Cross-Dock	Joliet, IL	05:00-23:00	Mon-Sun	8	none
IND1	Indianapolis DC	Indianapolis, IN	06:00-20:00	Mon-Sat	10	10
MKE1	Milwaukee Satellite	Milwaukee, WI	07:00-17:00	Mon-Fri	4	none

Facility addresses:

- CHI1 - 4100 S Packers Ave, Chicago, IL 60609
- JOL1 - 2750 Channahon Rd, Joliet, IL 60436
- IND1 - 6200 W Raymond St, Indianapolis, IN 46241
- MKE1 - 501 W Becher St, Milwaukee, WI 53207

Facilities are closed on days outside their listed operating days. Joliet Cross-Dock (JOL1) is the only facility that operates on Sundays; freight that must move on a Sunday should be routed through it.

2. Dock Appointment Scheduling

2.1 **Appointments are mandatory.** Every truck delivering to or collecting from an HPL facility must hold a confirmed dock appointment in the HPL Dock Scheduler. Trucks without an appointment are worked only if a dock is free and may wait until the end of the day.

2.2 **Slot length.** Appointments are booked in 60-minute slots. A slot is available only if its status in the Dock Scheduler is "available"; slots marked "blocked" are out of service (for example for maintenance) and cannot be booked.

2.3 **Lead time.** Standard appointments must be booked at least 24 hours before the slot start time. Appointments for shipments containing hazardous materials must be booked at least 48 hours in advance (see HPL-EHS-004).

2.4 **Hazmat docks.** Hazardous materials may only be loaded or unloaded at designated hazmat docks:

- CHI1 (Chicago Central DC): docks 11 and 12
- JOL1 (Joliet Cross-Dock): no hazmat docks - hazardous materials are not accepted at this facility
- IND1 (Indianapolis DC): dock 10
- MKE1 (Milwaukee Satellite): no hazmat docks - hazardous materials are not accepted at this facility

2.5 **Carrier limits.** A single carrier may hold at most 6 appointments per facility per day, to keep dock capacity available for all partners.

2.6 **Rescheduling and cancellation.** Appointments may be moved or cancelled free of charge up to 4 hours before the slot start time. Later cancellations are treated as no-shows (Section 3.3).

3. Arrival and Check-in

3.1 Drivers should arrive 15 minutes before the appointment and check in at the gatehouse with: the BOL, the HPL shipment ID (SH-NNNNN), a valid driver's license and, for hazmat loads, the Safety Data Sheet (SDS) and emergency response information.

3.2 **Grace period.** A driver who checks in no later than 30 minutes after the appointment start is treated as on time.

3.3 **Late arrival and no-show.** A driver who arrives more than 30 minutes late forfeits the appointment. The carrier must book a new slot in the Dock Scheduler and may be charged a no-show fee of $150.00. The same fee applies when a carrier does not arrive at all or cancels less than 4 hours ahead.

3.4 **Free time and detention.** HPL aims to complete loading or unloading within 2 hours of check-in. Carriers that checked in within the grace period may bill detention after 2 hours at $75.00 per hour (see HPL-LEG-001, Section 5.6). Detention is not payable to drivers who arrived late.

4. Receiving

4.1 **Inspection.** Receivers check piece count, visible condition and seal number against the BOL before signing. Any shortage, overage or damage (OS&D) must be written on the delivery receipt before the driver leaves; see HPL-OPS-006 for claims.

4.2 **OS&D reporting.** OS&D findings are entered in the warehouse management system within 24 hours of receipt.

4.3 **Dock-to-stock.** Received goods must be put away and available for picking within 24 hours of check-in.

4.4 **Rejected freight.** HPL refuses freight that is leaking, has damaged hazmat packaging, or exceeds the pallet limits of HPL-OPS-005 by more than 10%.

5. Outbound and Cut-off Times

5.1 **Same-day cut-off.** Orders released to the warehouse before 15:00 local time ship the same day. Orders released after 15:00 ship the next operating day of the facility.

5.2 **Carrier selection.** Outbound shipments are tendered to carriers listed in the HPL Carrier Registry that serve the destination zone and mode. Hazmat shipments may only be tendered to hazmat-certified carriers.

5.3 **Load verification.** Before the trailer is sealed, the loader scans every pallet or parcel label and confirms the count against the BOL.

6. Inventory Control

6.1 **Available quantity.** The quantity available to promise for a SKU is quantity on hand minus quantity reserved for open orders.

6.2 **Replenishment alerts.** When the quantity on hand of a SKU at a facility falls below its reorder point, the inventory team notifies the owning customer the same business day.

6.3 **Cycle counts.** Every SKU must be counted at least once every 30 days. SKUs whose last count is older than 30 days are flagged for counting in the next shift.

6.4 **Hazmat storage.** Hazmat SKUs may only be stored at facilities with hazmat docks (see Section 2.4).

7. Safety

7.1 High-visibility vests and safety footwear are required on the dock floor. Drivers must stay in the designated driver area unless directed by HPL staff.

7.2 Wheel chocks or a vehicle restraint must be engaged before any forklift enters a trailer.

7.3 Damaged or leaking hazmat packages are handled only by EHS-trained staff following HPL-EHS-004.

8. Contacts and Escalation

Need	Contact
